

To,
Vidita Vaidya

Subject: Regarding four_color_theorem has been solved

I have solved four_color_theorem, myself in 2001-02 CE,
and also examined that Poincare_conjecture is true, in 2002-03, using the Calculus method of doing things,
and am aware that 'percolation', has been documented in Algorithms_in_C, by Robert Sedgewick.

I do not have a good opinion, about educational practices in India. Quite a lot of juniors, copied from me without ability, at engineering college.

I traveled to Beas River Basin, and other places in North India, alone, in 2003-04.

Kavitha is the daughter of the Chief Minister, and a senior of mine, at vnr_vjiet. https://en.wikipedia.org/wiki/K._Kavitha

There was the Telangana issue, during engineering college 1999-03, and juniors copied from me, and I let them do that,
in a context related to => https://en.wikipedia.org/wiki/Marri_Chenna_Reddy (edited version of Euler's identity)
Later after political freedom, they continued with their copy-paste, and died. https://en.wikipedia.org/wiki/2014_Beas_River_Tragedy

https://en.wikipedia.org/wiki/Buddha_Statue_of_Hyderabad
<https://rarehistoricalphotos.com/the-burning-monk-1963/>

Regarding Music_and_Lyrics (2007), Mrs. Madonna Louise Ciccone has paid a lot (around 60 million British pounds), for her divorce,
and I would consider this to be an equivalent, participation, by a female in the above photograph.

And in this particular context only, I would be willing to vote for the feminists.

Generally speaking, I came across a lack of kindness and jurisprudence,
by mothers, that were participating in tribalism, with greed, in favor of 'opportunities' for their own reproduction.

Regarding political meddling, in the past (2005-06), and https://en.wikipedia.org/wiki/Ayodhya_dispute
I had mentioned that Tabu (tavasum Hashmi) and Salman Khan court case papers, are involved in percolation and taxes, in an eight_planet_solar_system.

I want Hindu_prajakta_nimbhorkar, to publish that "re-incarnation does not exist", while 'moving forward' includes Julia Eileen Gillard. - "Although Tabu was acquitted in the blackbuck poaching case on 5 April 2018, the Rajasthan High Court issued her with a notice, challenging her acquittal on 11 March 2019."

Generally speaking, I was happy to come across P.V. Narasimha Rao, during idly-breakfast, in the year 2000, and do not have any qualms, about that.
Around 2018, before the death of Stephen Hawking, I was able to inform my father, that I have been an atheist, since a long time previously.
OK, then, bye.

N K Kumar (convinced atheist)

ps: <http://bit.ly/julia-review> [Always Look on the Bright Side of Life Sing-Along - Monty Python](#)

Regarding 'something_deeply_hidden' by S.M.Carroll, addition will happen after percolation, involving transcendental_numbers instead of algebraic_numbers.

Previously, I had already informed Angela Merkel, about the following subtraction. <https://en.wikipedia.org/wiki/Merkel-Raute>

The following are four-variables, at the same 'time' =>

- Angle within a regular polygon of a-sides = $[(a-2)/a]*(\pi)$; while summation = $1 + 2 + 3 + \dots + (a-1) + a = a*(a+1)/2$;
- Angle within a regular polygon of b-sides = $[(b-2)/b]*(\pi)$; while summation = $1 + 2 + 3 + \dots + (b-1) + b = b*(b+1)/2$;
- Angle within a regular polygon of c-sides = $[(c-2)/c]*(\pi)$; while summation = $1 + 2 + 3 + \dots + (c-1) + c = c*(c+1)/2$;
- Angle within a regular polygon of d-sides = $[(d-2)/d]*(\pi)$; while summation = $1 + 2 + 3 + \dots + (d-1) + d = d*(d+1)/2$;

Regarding 'usual' rigged elections, 60_percent, is directly related to Boltzmann_equation. https://twitter.com/Humanists_UK/status/1227966525233123328
Are atheists really unelectable in the US? Seemingly not according to this poll. In spite of the well held belief that Americans view 'atheist' as the worst trait in a presidential candidate, a record 60% now say they'd consider voting for an atheist!
